Background:
The eFINDS application is the Health Commerce System (HCS) platform for tracking evacuee movement. eFINDS captures minimal amounts of data, and allows facilities to track the evacuees as they move to other facilities, facility types or temporary shelters. This information is shared in   real time with HCS authorized users statewide.

eFINDS is a role based application, therefore, the HCS Coordinator will need to assign the appropriate HCS users to the eFINDS Reader (for LHDs & NYSDOH ROs), or the facility eFINDS Data Reporter or eFINDS Reporting Administrator role. A key component to the success of
