Job Qualifications

Ambulatory Services

Abdominal Imaging Advanced Practice Provider, within the department of Imaging Sciences (251446)

FT position available, Monday - Friday.

The Abdominal Imaging Advanced Practice Provider (AI APP) is responsible for providing competent medical care in accordance with the professional scope of practice and current State of New York Regulatory Statues. The position is designed to be onsite-at SMH. There is future potential for reading at other affiliated sites covered by the Abdominal Imaging Division. As an AI APP, you will be expected to become proficient in the full spectrum of Abdominal Imaging applications to problem solving for diagnostic challenges affecting the GI System and GU System, Vascular System and other body systems found in the abdomen and pelvis. Problem solving will include providing guidance to clinicians in the planning/selection of studies and review of studies after completion. The timeline for proficiency will vary depending upon the candidate's prior scope of practice. Examination reviews are in conjunction with interpretation with the supervision of a licensed Radiologist. Our patient population includes ED patients, inpatients, and outpatients. Exam preparation encompasses the planning and protocolling of studies followed by real time review of imaging, especially for acutely ill patients. AI APPs are educated to become proficient in rapid response assessment and treatment of patients with contrast reactions. The AI APP collaborates with all members of the Imaging Sciences team in the promotion and provision of our common goals of optimizing patient care. The AI APP will participate in the education of learners (students and new employees) using clinical learning experiences, knowledge, sharing and skill training. Key characteristics for a practitioner in these roles include an ability to work independently and in the framework of a team. The ability to meet the intellectual and physical challenges of this rewarding position are key elements of the success of our team efforts. **QUALIFICATIONS:** Current New York State License as a Physician Assistant or Nurse Practitioner. Current RT license or eligibility not required but a plus. 3-5 years minimum practice experience. Radiology experience not required.

Available Positions

partner with nationally-renowned physician experts, dedicated nursing, social work, and technical staff in providing state-of-the-art care to patients and families. Major responsibilities include providing direct and indirect care for patients seen in the ambulatory setting. The APP will participate in the education of learners (students and new employees), using clinical learning experiences, knowledge sharing and skill training. Requirements: NYS NP or PA license/ CPR, national certification by ANCC or ACNP.

Neurology (Headache Center) - Nurse Practitioner/Physician Assistant (247808)

FT position, Days, Monday-Friday, no holidays required

Exciting opportunity to work with a collaborative team in the Comprehensive Headache Center, caring for a variety of patients with headache disorders including migraine with and without aura, tension-type, cluster, post-traumatic, post-concussive, and chronic daily headaches. Responsibilities include evaluation, development of individualized treatment plans

Available Positions

details will be provided after applications are reviewed)

Exciting opportunity for an advanced practice provider (APP) to work in collaboration with Maternal-Fetal Medicine (MFM) Faculty and other APPs in provision of clinical care for patients with complex obstetric needs. The position would focus on the pregnancy care of high-risk obstetric patient population. MFM offices are located at Lattimore Road and Red Creek Drive. There are multiple specialty areas and focuses within these offices, including prenatal care and consultations, as well as the Diabetes in Pregnancy program (DiPP), the pregnancy loss clinic, and genetics clinic. The APP as part of the MFM multidisciplinary team provides direct patient care and management, in-basket management, follow up and education for complex Maternal-Fetal Medicine patients. Learners including fellows, residents, APP students, and medical students rotate through these offices. APPs are expected to aid in multidisciplinary care management for all patients in the practices, including coverage of electronic/phone-based patient questions, result and order follow-up, regional care coordination, and participation in delivery care planning teams. Cross-coverage and support of the MFM APP cohort would be expected.

Candidates must have excellent communication skills, self-motivation for on-going learning, flexibility and teamwork experience. While work is supported by MFM faculty, who are available at all times, the candidate would need to be able to work independently to see and support patients. Candidates must be NYS NP, PA, or CNM licensed, and eligible for certification. Shifts include daily patient visits and care management, with a minimum of 8 sessions/week. While not required, fetal monitoring experience, perinatal loss certification, nutritionist degree, diabetes experience/certifications, and/or IBCLC certifications would be welcome, as would bilingual skills (any language).

Orthopaedic Services

Orthopaedic Inpatient/Outpatient Canandaigua/FFT - Nurse Practitioner/Physician Assistant (251281)

FT/PT position available, primarily days with some evenings/weekends.

Experienced APP needed for busy practice involving orthopedic care in Canandaigua. The position is a wonderful blend of ED consults, OR work and clinic-based follow-up. The APP will be part of the orthopedic group working in Canandaigua, closely aligned to the surgeons. There is significant independent work, therefore the APP must have orthopedic experience. Specifically, the APP will work in FFT hospital covering orthopedic consults in the ED, OR work, and outpatient clinic time at our new Canandaigua office. The APP should be comfortable with fracture reduction and management, nail bed/lac repairs, and be comfortable working independently. The successful candidate will join other APPs in a professionally rewarding environment - clinically challenging with tremendous opportunities for advancing skills. Candidate must possess excellent communication skills and a willingness to learn new skills. Prior NP/PA experience required, with preferred orthopedic experience. The APP will participate in the education of learners (students and new employees), using clinical learning experiences, knowledge sharing and skill training.
